LOMA LINDA UNIVERSITY FACULTY MEDICAL GROUP

ABOUT US

Started in 1995 by the leadership of the Loma Linda University School of Medicine, our medical group began as a physician-led administrative team supporting all disciplines dedicated to the care and wellbeing of Southern California's Inland Empire. Today, we have grown to 1,200+ providers in a variety of practice settings.

SERVICE

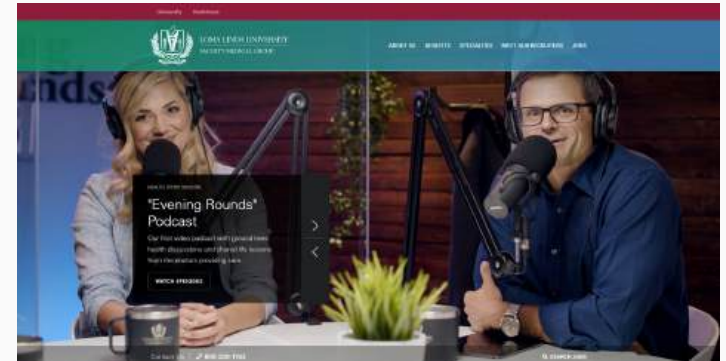

Loma Linda University Faculty Medical Group (LLUFMG) is affiliated with Loma Linda University School of Medicine and the hospital system of Loma Linda University Health, we support the mission of six hospitals and multiple clinics. We also provide clinical services at Riverside University Health System and the Arrowhead Regional Medical Center.

UNIQUE RESOURCE

LLUFMG is an important resource for the region's healthcare system. In addition to providing a wide range of basic and specialized services for the region, LLUFMG also educates the next generation of healthcare leaders and participates in cutting-edge research.

Serving our community since 1995, LLUFMG continues to expand and provide excellent care throughout Southern California and beyond. With over 150 convenient locations for patients to choose from, we have made it easier for patients to receive their care.

GENERAL PEDIATRICS

ABOUT US

- From routine well visits to complex care coordination, our team of pediatric experts serves as a trusted home base for the medical needs of children. We see patients from newborns to age 18 – and offer specialized care for teens.
- Routine Care
 - From minor illnesses to simple sprains, well visits, and sports physicals, general pediatrics provides expert care for children when they need it.
- Adolescent Care
 - As your teenagers grow, their medical needs evolve. We help bridge the gap between childhood and adulthood with providers who specialize in the care of adolescents.
- Chronic & Complex Care
 - Our providers are very experienced in caring for children with chronic or complex health needs. We work directly with needed specialists to coordinate care.

NEONATOLOGY

LLUH is the only center or most performing in the Inland Empire for these procedures and services:

ABOUT US

- Loma Linda University Children's Hospital was ranked #41 in the nation in neonatology for 2022-23 by U.S. News & World Report.
- We provide the best possible care for mothers and their babies, right from the start.
- We are committed to providing family-centered, comprehensive services for a healthy pregnancy, regardless of whether the care is routine or complex.
- When babies come early or have complications, our Neonatal Intensive Care Unit (NICU) team provides unrivaled care for the most complex conditions.
- The best in care: We treat newborns who need the most complex care in our 84-bed, Level 4 neonatal intensive care unit (NICU). We're one of only a few NICUs in Southern California to earn the highest designation in expertise.
- All the specialists you need: In addition to neonatologists, your baby is supported by an entire team of specialists throughout our hospital and the San Manuel Maternity Pavilion.
- Neurological care: Our NeuroNICU works with pediatric neurologists to diagnose, treat and monitor your baby's neurologic injuries or disorders. Our commitment to neuroprotective care also extends to babies in the NICU who have not been diagnosed with a neurological condition.
- Premature care: If your baby is born before 30 weeks, our Small Baby Unit is ready to provide highly specialized care.

PEDIATRIC CHILD ABUSE

**LLUH is the only center or most performing in the
Inland Empire for these procedures and services:**

ABOUT US

- Our child abuse physicians take care of patients in both San Bernardino and Riverside Counties.
- We are affiliated and see patients at the Children's Assessment Center of San Bernardino (CAC), a public/private partnership between San Bernardino County and Loma Linda University Children's Hospital.
- The CAC provides forensic interviews and evidentiary medical examinations to assist in the evaluation of child abuse allegations.
- We coordinate services in a child-focused atmosphere, thus reducing trauma to child victims and their families.

- Provides competent, quality child abuse assessments to child victims
- Promotes a nurturing atmosphere for children and families
- Provides referrals for treatment as necessary
- Our program reduces the number of interviews of the child victim/witness, thereby reducing the trauma to the child(ren)
- Coordinates and networks with a multidisciplinary team

PEDIATRIC CRITICAL CARE MEDICINE

ABOUT US

- The Pediatric Intensive Care Unit (PICU) is a 25-bed tertiary care unit dedicated exclusively to the specialized medical and surgical needs of critically ill children from birth through adolescence.
- Access to specialized intensive care is often the difference between life and death for a critically ill child, and for more than 25 years, the PICU at Loma Linda University Children's Hospital has provided children with advanced medical treatment when they needed it most.
- A multidisciplinary team including physicians, nurses, pharmacists, child life specialists, respiratory therapists, physical therapists, chaplains, and other clinicians collaborate to best meet the medical, psychosocial, and spiritual needs of the hospitalized child.

LLUH is the only center or most performing in the Inland Empire for these procedures and services:

- Pediatric critical care has cared for a wide range of pediatric conditions:
 - Life-threatening infections
 - Respiratory problems
 - Trauma
 - Near-drowning
 - Cardiac problems
 - Seizures
 - Child abuse
- Bronchoscopy
- Extracorporeal membrane oxygenation (ECMO)
- Ventilator Management
- Airway Management
- Ultrasound
- Peripherally Inserted Central Catheter
- The PICU also provides essential transport services for more than 1.2 million children living in San Bernardino, Riverside, Inyo, and Mono counties

PEDIATRIC GENETICS

ABOUT US

- The Division of Medical Genetics is committed to providing the highest quality, state-of-the-art genetic services to patients and their families and to engaging in academic and professional activities that advance genetic knowledge and optimize health outcomes through advocacy, counseling, education, outreach, and research.
- We are a group of physicians and genetic counselors who provide consultations, risk assessments, and genetic counseling for children, adults, and their families for a variety of inherited disorders. Our genetics team offers its expertise to patients who are searching for a diagnosis for their complex or rare disorder. We strive to answer the question “why did this happen” and put an end to a patient’s long and frustrating diagnostic odyssey.
- We develop and coordinate an individualized comprehensive evaluation that includes genetic and genomic testing in both inpatient and outpatient settings. We inform patients and families about their diagnosis and provide support groups and other resources.
- Our outpatient services include special clinics for Skeletal Dysplasias and Syndromic Obesity in addition to general Genetics clinics. We also provide genetic services to many multidisciplinary specialty team-based clinics: Metabolic Genetics and Newborn Screening Center, Cardiology, Craniofacial disorders, Cystic Fibrosis, Breast, Ovarian, GI cancers, and cancer predisposition syndromes, and Adult Neuromuscular disorders.
- Accurate and early diagnosis can lead to better surveillance and treatment strategies for patients and their families.

PEDIATRIC HEMATOLOGY ONCOLOGY

**LLUH is the only center or most performing in the
Inland Empire for these procedures and services:**

ABOUT US

- The Pediatric Hematology Oncology Stem Cell Transplant Intensive Care Unit treats pediatric blood-related diseases and cancers and is the largest of its kind in the Inland Empire.
- Dedicated to serving the specialized medical needs of children, from newborns to adolescents, diagnosed with cancers such as leukemia, brain tumors, and blood related diseases such as hemophilia, this 33-bed unit is staffed with a highly skilled team of healthcare professionals.
- Patient care is guided by the expertise of a multidisciplinary team of physicians, residents, nurses, a clinical nurse specialist, educator, case manager, pharmacist, social worker, and child-life specialist.
- Every caregiver dedicates unending support to the patients and families during this most difficult time, sharing in both the trials and victories of the healing process, as they work to conquer this illness together.

PEDIATRIC NEPHROLOGY

LLUH is the only center or most performing in the Inland Empire for these procedures and services:

ABOUT US

- Loma Linda University Children's Hospital was ranked #32 in the nation in pediatric nephrology for 2022-23 by U.S. News & World Report.
- Division of Pediatric Nephrology provides services to children with kidney diseases, hypertension, and bone disorders from newborns to 21 years of age.
- We are the designated Pediatric kidney disease center for the inland empire and service the counties of San Bernardino, Riverside, and other adjacent counties.
- We provide medical management for children with hypertension, kidney and bladder diseases, fluid and electrolytes disorders, acute and chronic kidney disease, kidney failure, dialysis, and kidney transplant.
- All modalities of dialysis are provided; this includes continuous renal replacement therapy, peritoneal dialysis, and hemodialysis. Pediatric kidney biopsies are routinely performed at our center.
- We are the only outpatient chronic dialysis center for pediatric patients in San Bernardino and Riverside counties. In addition, we provide all forms of inpatient and outpatient apheresis therapies to pediatric patients.
- We are also the only pediatric kidney transplant center located in the Inland Empire that receives transplant referrals from all Southern California counties (and bordering states).
- We are a California Children's Services (CCS) certified Specialty Renal Team center. The renal team center has a renal dietician, renal social worker, renal nurse practitioner, and a nephrology nurse specialist to provide comprehensive care to all pediatric patients with chronic kidney disease and kidney transplants.

PEDIATRIC NEUROINTERVENTIONAL RADIOLOGY

LLUH is the only center or most performing in the Inland Empire for these procedures and services:

ABOUT US

- The Division of Pediatric Radiology, Loma Linda University Children's Hospital (LLUCH) provides comprehensive pediatric imaging in all imaging modalities for pediatric diagnostic problems for the neonate, infant, juvenile, and adolescent.
- It serves the extensive pediatric physician referral base of Southern California's Inland Empire – the large Southern California counties of San Bernardino, Riverside, Inyo and Mono that extend eastward from Los Angeles to the western Nevada border.
- Pediatric radiology is distinguished from adult radiology by technical factors, equipment, protection, immobilization and methods of communication with children and their parents, as well as providing distinctive diagnostic processes for pediatric disease.

- Cerebral angiography
- Embolization of brain or spinal AVM
- Pre-operative embolization for juvenile nasal angiofibroma
- Intrathecal nusinersin infusion

PEDIATRIC NEUROLOGY

LLUH is the only center or most performing in the Inland Empire for these procedures and services:

ABOUT US

- One of the largest pediatric epilepsy programs in California.
- We have skilled and internationally recognized experts in the field of pediatric neurology.
- Our whole-child treatment philosophy focuses on every aspect of care — physical, cognitive and behavioral.
- Comprehensive child evaluations are performed to support their medical, educational, and social needs.
- Our specialty clinics provide expert diagnosis and innovative therapies based on your child's specific symptoms.
- One of the largest Pediatric Critical Care Units (25 beds) and Neonatal Intensive Care Units (90+ beds) in the state, staffed by critical care and neonatal specialists and neurosurgeons who provide 24/7 evaluation and treatment for newborns, infants, and children with catastrophic brain and spinal cord injuries.

PEDIATRIC PHYSICAL MEDICINE & REHABILITATION

**LLUH is the only center or most performing in the
Inland Empire for these procedures and services:**

ABOUT US

- Our pediatric rehab specialists know how overwhelming it can be for both parents and children to undergo therapy.
- We work closely with families to develop a personalized treatment plan aimed at improving each child's ability to reach their potential.
- Short-term therapy for infants through adolescents is available in both outpatient and inpatient settings.
- Inpatient and outpatient services use the latest technology to meet our patients' therapy goals and to ensure the best outcomes.
- Therapists for adolescents are paneled by California Children's Services (CCS) to ensure the quality of care for patients under 18 years of age
- Recreational facilities are designed to meet the needs of adolescents and provide an active, energetic environment
- Tutor support for adolescents while in rehabilitation
- Therapists can help adolescents become involved in adaptive sports to support physical, social, and mental health

- Spasticity management
- Intrathecal pumps
- Chemical denervation

PEDIATRIC PSYCHOLOGY

**LLUH is the only center or most performing in the
Inland Empire for these procedures and services:**

ABOUT US

- We help your child deal with long-term illnesses and sudden injuries that affect their brain function, emotional state, and behavior. Our pediatric neuropsychologists and psychologists help parents understand their child's condition and provide a full range of treatment options.
- We diagnose and treat health issues that may be related to medical, behavioral, emotional, and body control problems. Our specialists treat disorders like ADHD, autism, dyslexia, and cognitive impairment due to injuries or other illnesses.
- Pediatric Neuropsychological Assessment Program
 - The Pediatric Neuropsychological Assessment Program (PNAP) is a specialty clinic that evaluates a child's cognitive function and provides treatment recommendations.
 - Our neuropsychologists and neurologists have the expertise to diagnose and treat a wide variety of issues.
- Autism Assessment Center (ACC) of Excellence
 - The AAC is an affiliate clinic that provides the specialized testing and care required for kids with autism.

PEDIATRIC VASCULAR AND INTERVENTIONAL RADIOLOGY

ABOUT US

- The Division of Pediatric Radiology, Loma Linda University Children's Hospital (LLUCH) provides comprehensive pediatric imaging in all imaging modalities for pediatric diagnostic problems for the neonate, infant, juvenile, and adolescent.
- It serves the extensive pediatric physician referral base of Southern California's Inland Empire – the large Southern California counties of San Bernardino, Riverside, Inyo and Mono that extend eastward from Los Angeles to the western Nevada border.
- Pediatric radiology is distinguished from adult radiology by technical factors, equipment, protection, immobilization and methods of communication with children and their parents, as well as providing distinctive diagnostic processes for pediatric disease.
