

## **Onsite Health and Wellness (Biometric) Screening**

### **Release of Liability Informed Consent Form**

I, the undersigned, represent that my participation in this Biometric Health Screening is voluntary. My individually identifiable health information will not be shared with my employer however my employer may be advised of the fact of my participation in the Biometric Health Screening.

I understand my individually identifiable information may be shared with and used by my employer-sponsored group health plan to provide health management and/or disease management services including data aggregation for program improvement purposes. Such information will not be used for any other purpose. The importance of safeguarding individually identifiable health information is recognized and all organizations involved in this screening and/or health fair are obligated to take reasonable steps to protect such information from unauthorized access or use.

I, the undersigned, hereby consent to the collection of blood pressure, height, weight, BMI readings, waist circumference, body composition data and a blood sample for the purpose of measuring my cholesterol and glucose levels. I hereby release Health Solutions Services, Inc., my employer and any other organization (s) associated with this screening and/or health fair, their affiliates, directors, officers, employees, successors and assigns, from any liability arising from or in any way connected with my participation in any of these tests. I understand that:

1. The data derived from the test(s) are considered to be preliminary; they are screening assessments only. They do not constitute a diagnosis of hypertension, pre-hypertension, obesity, hypercholesterolemia, pre-diabetes or diabetes.
2. The responsibility for initiating a follow-up examination to confirm the results of this screening and obtain professional medical assistance is mine alone, and not that of any organization(s) associated with this screening or health fair.
3. The chemical analyzer used to determine plasma glucose and serum lipid levels may yield results that are at variance from those produced by standard reference laboratory analyzers.
